ABOUT ART BASEL

Art Basel is the world's largest and most prestigious art fair. Since 1970, the international art world has united every year for a couple of days in June, for an amazing display of modern and contemporary art at the Messeplatz in the heart of Basel, Switzerland.

At Art Basel, more than three hundred galleries from thirty-six countries exhibit works. Every artistic medium is represented: paintings, sculpture, installations, videos, prints, photography, and performance. The artworks exhibited attract more than 70 000 artists, collectors, gallerists, museum directors, curators, and art lovers.

Art Basel has had major success in expanding to Miami, Florida (2002) and to Hong Kong (2013).

VIP TOUR

In **Emerging Artists Tour** eclecticism of contemporary photography, sculpture and painting will be addressed, including artists from Lucas Blalock's artistically arranged and photographed foods to Matt Hoyt's installations made of miniature ceramics to punchy yet painterly video works of Ken Okiishi. A few young artists from the Baltics represented at the fair will also be discussed.

In **Mid-career Artist Tour** conceptual and abstract painting, photography, sculpture and installation will be discussed. Insight into why the most critically and curatorially acclaimed artists at the fair have gained recognition will be provided.

Established post-war Italian, French, German, and East European artists are experiencing great museum and market revivals. In **Post-War European Artist Tour** we will educate you about these artists and other modern masters including Fernand Leger and Adolph Gottlieb whose works will be available at Art Basel. We will also introduce under-recognized figures such as Pop artist Rosalyn Drexler, early neon artist Keith Sonnier and German Zero group artist Heinz Mack who will be featured in the fair.

WHO SHOULD ATTEND?

The VIP Tour is designed both for those familiar with the art world and those wanting to get a first impression.
