

BOOST YOUR ENERGY AND MOTIVATION LEVEL WITH A FOCUS ON STRENGTHS:

**3,5-hours of positive psychology for increased wellbeing and happiness with
coach M. phil Anda Klavina April 3, Verbier, Switzerland**

CONTEXT

Today's business environment requires motivating and reenergizing methods that are easy to apply, get to the core quickly, and produce effective and measurable results.

Studies on positive psychology have found that helping employees to identify and engage their top strengths (talents) was one of the three 'essential drivers' of employee engagement (along with managing emotions and finding purpose in one's work). By consciously employing signature strengths, our state of psychological wellbeing is significantly increased, and the effect remains for up to six months!

"Using our strengths makes work more fun, transforms a job or a career into a calling, and increases flow," Martin Seligman.

SEMINAR

In this seminar participants will 1) identify their top strengths using the VIA Character Strengths Survey, 2) discover the ways they can increase their productivity and work satisfaction by consciously applying their talents in new and different ways, 3) learn to compose stories for daily empowerment.

By developing a character 'strength language', and by recognizing one's own strengths and those in others, participants will be equipped with up-to-date methods of motivation and re-energization. They will learn ways to be more creative, productive, and happy!

YOU WILL:

- Receive a personal strength-building toolbox
- Practice a skill of strength-spotting in yourself and in others
- Learn the art of storytelling to help you explore the strengths and successes you can build on to successfully pursue new goals
- Learn how to rejuvenate your whole self
